

Biosecurity aspirations activity

N = Now T = Tomorrow - mark which statements reflect what you currently do, and what you would like to do!

New horses

- 1. Horses brought straight onto main yard without quarantine or testing
- 2. Horses quarantined for three weeks on arrival without tests
- 3. Horses blood tested before arrival and introduced straight onto main yard if clear
- 4. Horses quarantined for three weeks on arrival and blood tested while in quarantine
- 5. Horses quarantined for three weeks on arrival and tested by guttural pouch endoscopy
- 6. Other

Transport

- 1. Horses travel frequently on commercial, multiple horse lorries without biosecurity
- 2. Horses travel on borrowed/hired/shared vehicles without disinfection
- 3. Horses travel with other horses and on vehicles owned by friends/neighbours
- 4. Horses are quarantined/temperature checked for three weeks after travel with unknown horses or on unknown vehicles
- 5. Horses only travel in vehicles that have been routinely disinfected after every trip and with horses whose strangles status is known
- 6. Other

Events

- 1. Owners only take action if a horse at an event is seen with signs of strangles
- 2. Owners to avoid interaction with horses from other yards, sharing water, grazing, tools etc
- 3. Interaction between horses/equipment sharing avoided AND temperature check for three weeks on return
- 4. Horses quarantined for three weeks on return from an event
- 5. Interaction/sharing avoided AND horses quarantined for three weeks on return
- 6. Other

Using isolation

- 1. Isolation practices discouraged
- 2. Up to individual owner if they want to buy and use isolation equipment
- 3. Isolation only to be used when infectious disease is confirmed by a vet
- 4. Isolation just used for new horses or if there is an outbreak
- 5. Quarantine supplies always in stock and used as a precaution if there is any risk that a horse may be infected
- 6. Other

Communication

- 1. Talking about strangles avoided, disease hidden, owners of infected horse to be blamed and ostracised
- 2. Disease to be dealt with by owner, yard manager and vet with no other communication
- 3. All liveries to be informed in case of an outbreak but no public statements made
- 4. Support for liveries, provision of guidance and equipment, and public notifications in event of an outbreak
- 5. Protocol for new arrivals on yard website and all liveries required to be proactive about using biosecurity and putting isolation in place as a precaution without fear of judgement
- 6. Other
