

Hot to trot, or cool as a cucumber?!?

Who's the coolest horse on the yard?!? There's one way to find out! Take your horse's resting temperature and write it with their name below. A bit of fun for Speak Out On Strangles Day, but also a reminder that temperature checking is a great habit to get into!

Horse's Name	Temperature	Horse's Name	Temperature

Did you know that a horse developing strangles usually has a fever *before* they become contagious? Spot the disease at this stage, take action, and you are already a step ahead of the disease!
